## TRAKTORENWERK LINDNER

### Lintrac 90 for specialist crops

---

4-wheel steering vineyard tractor (unequal wheel)

The originality of this tractor lies in a traditional design, equipped to the standard of a large-scale agricultural tractor (continuously variable transmission) and with rear axle steering offering different driving modes (normal, crawl, articulated) adapted to viticulture.

This high-end tractor delivers outstanding driver comfort and manoeuvrability thanks to a tight turning circle. The Category 4 cabin offers optimum protection during spraying.
