Safe Cab Concept

The Safe Cab incorporates a number of features that enhance safety and working conditions for the user:

- Secure driving seat access
- Anti-crush cab compliant with ROPS Type 4 standard
- The category 4 cab protects the user from emissions from plant protection products: pressurised cabin with carbon filtration prevents polluted air from entering
- Good visibility (lighting, camera, wide-angle mirror)
- Ergonomic cab design: air suspension seat, armrest for joystick control and low noise level.
