PRESS RELEASE – 5 NOVEMBRE 2018

SYLVAIN BIODYNAMIE™, A NEW BARREL IS BORN

AT VINITECH, TONNELLERIE SYLVAIN LAUNCHES ITS NEW BARREL SYLVAIN BIODYAMIE

To support their clients and reinforce their own biodynamic approach to winemaking, the teams at Tonnellerie Sylvain have been working for the past few years to develop a new barrel which applies the principles of biodynamics to the entire barrel production process.

All the major step of the production process from tree to Sylvain Biodynamie barrel assembling (splitting, jointing, assembling, toasting...), are completed according to Tonnellerie Sylvain's technical specifications following a **precise schedule according to the lunar calendar**, either a flower or fruit day. These two days are chosen for a reason: in the world of biodynamic winemaking, they are widely recognised as enhancing the aromatic expression.

The teams at Tonnellerie Sylvain have thought this barrel in its globality. During the whole fabrication process, every aspect of the natural environment is considered to **preserve the natural balance of the living environment**. Especially during the maturation of the staves, that are arranged in a storage area dedicated to biodynamic wood.

Each Sylvain Biodynamie barrel is assembled by **master coopers who are well-versed and trained in the principles of biodynamics**. All the teams at Tonnellerie Sylvain have been mobilized around this project to offer the most "biodynamic" barrel possible.

KEY FEATURES OF THE PROJECT:

- The most complete biodynamic barrel making process,
- Respect of the lunar and planetary rhythms during the whole process (from tree to barrel),
- Respect of the balance of nature,
- Master coopers well-versed and trained in biodynamics

Tonnellerie Sylvain in brief:

- Creation in 1957
- Family company for 3 generations
- 47 employees
- 33000 barrels per year
- 30% of the barrels sold in France and 70% abroad

Come and visit us during Vinitech

Dates: 20-22 Novembre 2018 from 9 am to 6pm

Place: Parc des Expositions de Bordeaux | Stand : Hall 1 C 2902
